Product Description

- Outdoor athletes training on roads need to hear their surroundings. This product delivers music without forcing them to compromise on safety.
- Bone conduction technology is a genuine talking point. The unique design makes customers stop, ask questions, and buy after learning how it works.
- Safety conscious athletes are deeply loyal. A runner who finds a product that keeps them safe will actively recommend it to their entire running group.
- The device sits naturally next to premium cycling gear and running accessories. It serves as an easy add-on for customers already spending heavily on their sport.
- Swim schools and aquatic centres carry a highly targeted audience. Coaches and instructors who need to hear poolside while staying connected will view the Solo Pro 3 as the perfect, unknown solution.

Scale smarter with the right partner.

High quality electronics, reliable supply, and support that grows with your business. Bulk pricing. Custom solutions. Real partnerships.
