Product Description

- Homeowners who clean regularly understand the time vacuuming takes. Seeing a robot vacuum work shifts their mindset from questioning the purchase to wishing they had bought it sooner.
- Customers do not need to be convinced that automated cleaning is a good idea. They just need confidence that it works well, and the iRoom 600's advanced navigation closes that gap.
- Hotels and property managers buy these units to cut labor costs. A robot handling daily floor maintenance between deep cleans directly saves on housekeeping expenses.
- Airbnb hosts with multiple properties represent high volume repeat buyers. One host seeing massive time savings on a single property will quickly deploy it across their entire portfolio.
- Robot vacuums have graduated from a tech novelty to a daily necessity. Recipients of this practical gift use it every single day and highly credit the person who gave it to them.

Scale smarter with the right partner.

High quality electronics, reliable supply, and support that grows with your business. Bulk pricing. Custom solutions. Real partnerships.
